

INTERSECTION GROUP

# Capability Maps

## The Next Generation

Wolfgang Goebel

**INTERSECTION GROUP**

**We help people create better enterprises.**

# What went wrong with capability maps?

# What went wrong with capability maps?

IT centered view

Few practical design patterns

Ugly

Not very present outside  
architecture communities

# What we want to change...

Capabilities are central in organisation design, business components used as a modular “master structure” of the enterprise.

Organisational- and IT structures can be derived from this master structure.

“Modular business components.”  
Designed for Digital, J.Ross et.al

# ○ Capability

What we are able to do by orchestrating people and assets.

Track Maintenance

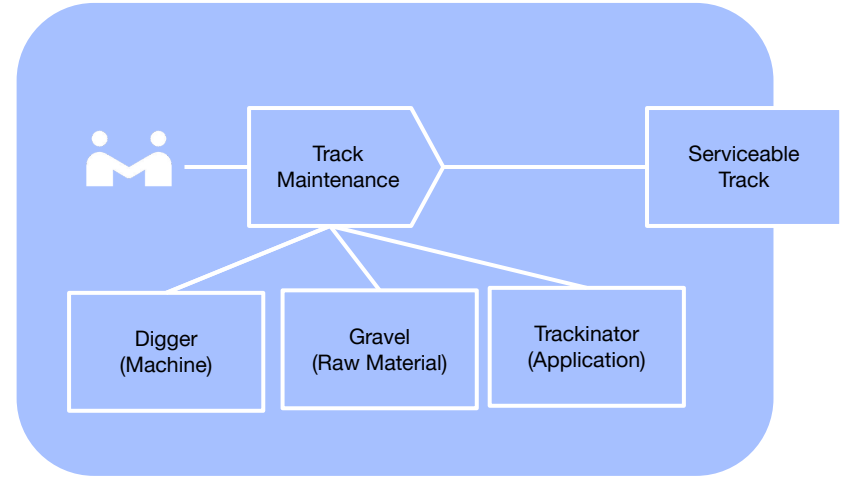

# ○ Capability

**What we are able to do by orchestrating people and assets.**

# ○ Capability

What we are able to do by orchestrating people and assets.

# ○ Capability

Needed for product creation

Well-defined outputs

Modularisation of enterprise

Track Maintenance

# □ Asset

A structure we need and use to perform our capabilities.

Machines, Buildings

Cohesion (“together what belongs together”)

# ○ Cohesion

**Together what belongs together**

**Many interactions between people and software applications within a capability**

# ○ Loose coupling

**Clear accountabilities**

**Avoid redundancy**

**Minimise interactions  
between capabilities**

**Key to adaptivity**

# ○ Building blocks

**Well defined outputs**

**Clear boundaries**

**Design for adaptivity**

**Reuse**

## Customer Interaction

Customer and Market Analytics

IT Change

# When are groupings “good”?

By color?

By size?

By shape?

By species?

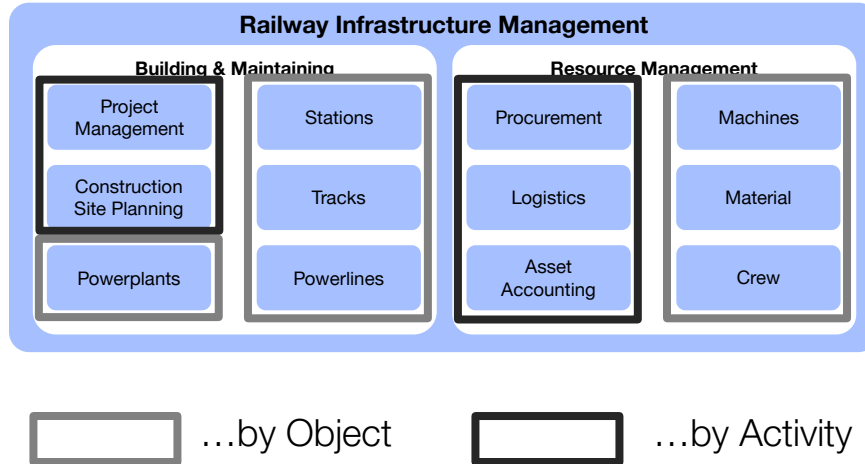

# 🏠 “Belongs together” in an enterprise context

**Make an intentional design decision based on specialisation.**

# 🏠 “Belongs together” in an enterprise context

**Make an intentional design decision based on specialisation.**

# ○ Customer Facing

Get in touch with  
our customer

Sales via various channels

Customer services

Customer information

○ Operational

○ Shared

Needed for  
other capabilities

Marketing

Legal

Human resources

Accounting

Finance

# ○ Change

Innovate existing capabilities

Strategic management

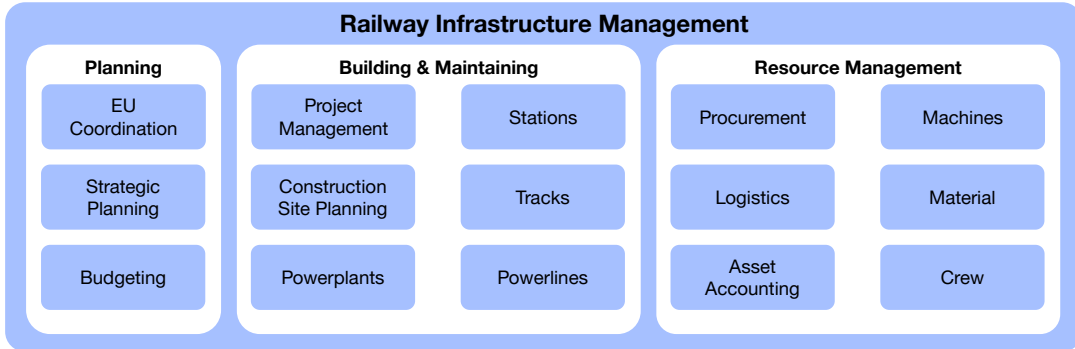

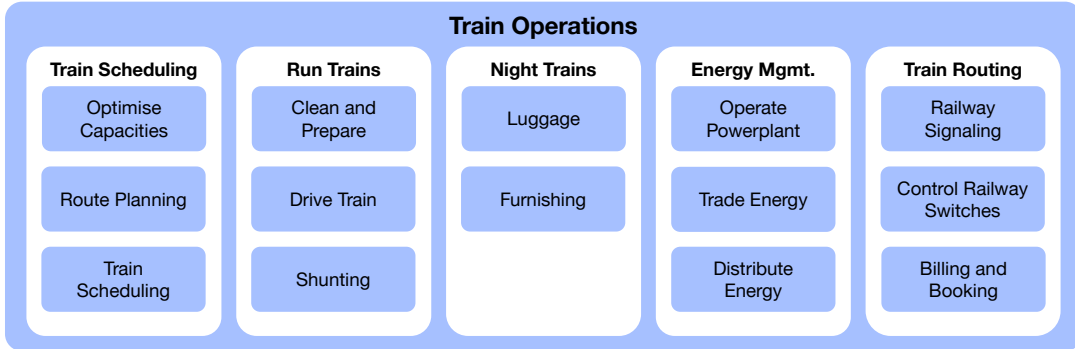

Product design

Enterprise design

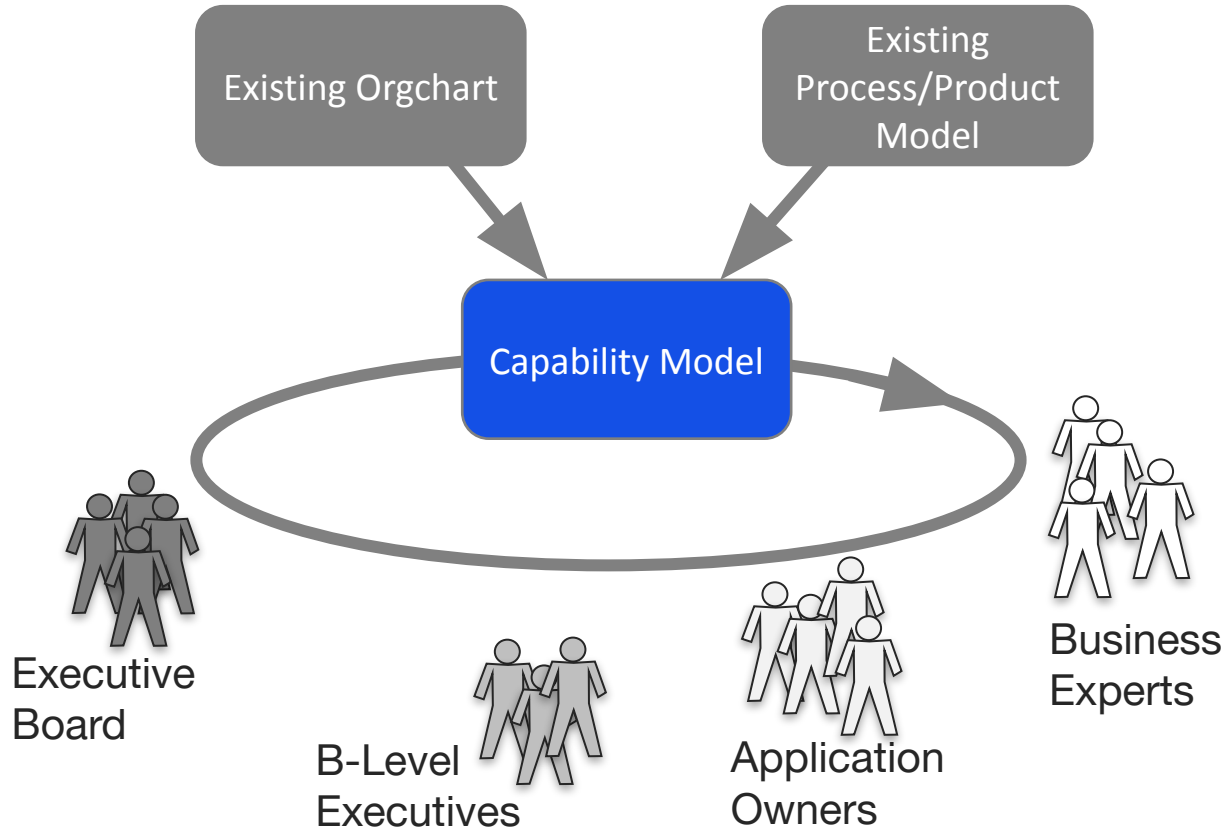

Innovation

Strategy

# ○ Broad elicitation process to get existing capabilities

## **Capability design patterns**

**Involve broad range of business experts**

**Use common terminology**

**Make products visible**

**Use categories consciously**

**Clear outputs**

**Avoid overlaps**

**Focus on essence (3-4 levels, ~100 capabilities)**

**Align boxes well**

## Today

**Capability maps use uncommon language and are used exclusively by Enterprise Architects.**

## Tomorrow

**Capability Boards are co-designed by all relevant business experts and used throughout the company (for Management, Organisation, Finance, IT, Asset Management, ...)**

# What went wrong with capability maps?

**"Always based on information objects"**  
call everything "management"  
(product-, claim-, money-, track-, train,...)

**Unnatural language**

**Capabilities present in IT only**

**Extremely weak biz & IT alignment**

**"Tennis Racket Management"?**

**"Tennis Ball Acceleration Management"?**

# What we want to change...

Based on highest cohesion

~~"Always based on information objects"~~

common

~~Unnatural language~~

everywhere

~~Capabilities present in IT only~~

Seamless busIT co-design

~~Extremely weak biz & IT alignment~~

Serve

## Process

“Related activities our enterprise carries out.”

### Process "Track Lifecycle"

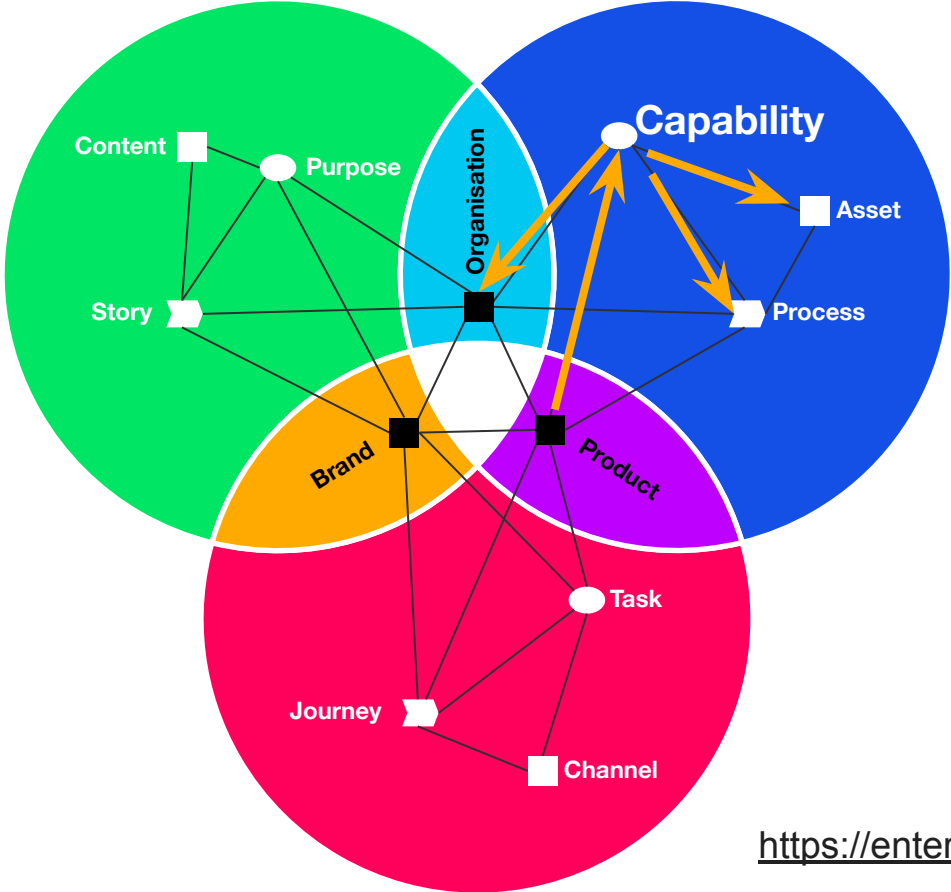

**Process/Activity = actually performed capability**

Only ONE way to design boundaries (caps, orga, activities, processes)

Seamless connection of process management & capabilities & org design

# How to design capabilities? - Product oriented!

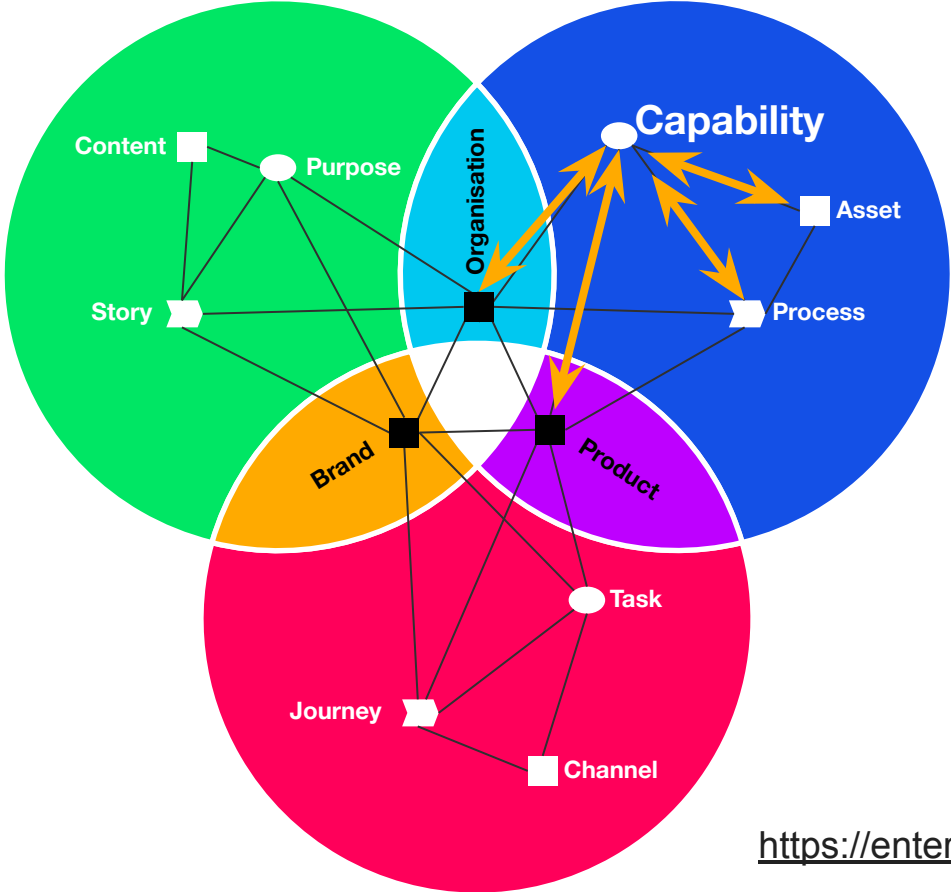

Startup

# How to design capabilities? - Driven by legacy

Existing Company

## What you've learned in this section..

- › Only ONE decomposition of the business
- › Start from existing docs (org, processes, website..)
- › Run a broad elicitation process
- › Enable business to own their capability design
- › Design for highest cohesion
- › Select categories with care
- › Consolidate Process Models with Capabilities
- › Layout for beauty

**Business / IT Alignment -> BusinessIT Co-Design**

## Capability Maps - the Next Generation!

With Wolfgang Goebel

Webinar  
June 12, 2023  
Online

June 12th, 9am Berlin, Paris - In this webinar with Wolfgang Goebel we present the basic concepts of capability modeling.

Details

Register

## EDGY 23

A language for collaborative Enterprise Design

Webinar  
June 19, 2023  
Online

June 19th, 9am Berlin, Paris - Bard Paesgaaj and Milan Guenther will host an EDGY 23 presentation.

Details

Register

## Milky Way Enterprise Map

With Annika Kiyver and Wolfgang Goebel

Webinar  
June 26, 2023  
Online

June 26th, 9am Berlin, Paris - Annika Kiyver and Wolfgang Goebel show you how to bridge the gaps across identity, experience and architecture with Milky Way enterprise maps.

## Intersection Conference: September 18-20

9th global conference on Enterprise Design

Conference  
September 18-20, 2023, 09:00-17:00  
Vienna, Austria

9th Conference on Enterprise Design

## EDGY User Day: September 20

Learn from the cases of EDGY practitioners!

Conference  
September 20, 2023, 09:00-17:00  
Vienna, Austria

Learn from the cases of EDGY practitioners!

## EDGY Language Foundations: Enterprise Design Facets and Elements October

Online cohort-based course

Training  
October 12 to November 14, 2023, Tuesday & Thursday / 4pm-5:30pm Berlin / 10am-11:30am Montreal
