

In 2024 we launched

The open toolset to help people create better enterprises.

The open-source platform for enterprise design tools.

Our second EDGY Tool!

by Jim Dowling and Wolfgang Goebel

EDGY Capability Modelling Guidelines

by Jim Dowling and Wolfgang Goebel

How to structure a Capability Map

- Designing capabilities as organic modules
- Capability categories
- Capability hierarchy
- Designing capabilities around activities or objects
- Follow the flow to product delivery
- Identify capabilities that can be reused across processes
- Identify shared and change capabilities
- Ensure clear names and descriptions
- Create a two-dimensional layout

How to align investments with purpose

- Seek outside inspiration to overcome the blank page
- Exploring existing enterprise content
- Get mandate from senior leaders
- Co-create through top-down or bottom-up iteration
- Involve business experts
- Deal with resistance of middle managers
- Benchmark as-is capabilities.
- Clarify vision
- Identify where to focus.

**You are working very hard, but
does it really make a difference?**

Now free and Open Source!

This is the future of EDGY: we invite contributions from tool makers and authors, both new and widely used. Our open Sandbox is a space to build upon our Language Foundations and publish tools as part of EDGY as an Open Source toolset.

Good Housekeeping 2020

Journey steps as phases, tasks as actions to be taken

Capabilities can be used as higher-level back-stage elements. Whether to use process or capability elements in the backstage depends on the level of abstraction, which in turn depends on the context and what is appropriate for the purpose.

Benefits of using a Service Blueprint in co-design and collaboration with customers, service designers, and business architects:

Benefits of a Service Blueprint

Summarise changes

x-g.at/sb

Did you ever...

Work on evaluating and/or transforming an enterprise's **identity**, organisational culture or people engagement?

Work with leadership on defining or refining a shared **purpose and core story** (such as strategy, vision, mission)?

Collect, curate, author, audit or edit **content** important to an enterprise and its various audiences?

Analyse, optimise or improve your enterprise's operational **performance and adaptivity** for change?

Map or model key **capabilities and/or processes** required for carrying out an enterprise's activities?

Analyse and optimise the way an enterprise makes use of **assets** (infrastructure, information or applications)?

Do human-centric research into people's **experiences**, using interviews, observation or qualitative/quantitative studies?

Map or model people's (customer/user/employee) **journeys** and/or find out about their most important **tasks**?

Measure people's experience across **channels** to then make changes to the enterprise to improve it?

Work on the **organisational** structure, team collaboration and/or ways of working of an enterprise?

Design, develop or manage the **products** or services an enterprise delivers to its customers or other users?

Evaluate, design or develop **brands** to assess/influence how an enterprise is perceived by its audiences?

B15 Work on the organisational structure, team collaboration and/or ways of working of an enterprise?
